VILLAGE REACH®

Health Care That **Reaches Everyone**

Building responsive primary health care systems for under-reached communities.

Vision	Mission	Goal
A world where each person has the health care needed to **thrive**	VillageReach transforms health care delivery to **reach everyone**	Reduce inequities in primary health care, reaching **350 million people by 2030**

Today, where people live still determines whether they can access quality health care. We exist to change that.

VillageReach brings essential health services to the people who need them most. We build responsive primary health care systems that include under-reached communities, so everyone can access care no matter where they live.

Responsive Primary Health Care

Available

Health services, medicines and vaccines are available when and where people need them.

Adaptive

Health systems respond to changing needs, emergencies and shocks.

Responsive

Health systems routinely listen to communities and adapt services to their needs and preferences.

Building Systems for Lasting Impact

VillageReach works with governments, communities, regional institutions and partners to reduce inequities in primary health care. By designing health systems for under-reached communities, we create better systems for everyone.

Our Approach

How We Work

Learn
We begin by listening to communities, governments and health workers.

Co-develop
Together we design practical solutions to local challenges.

Test & Improve
We generate evidence and refine what works.

Scale
Working with governments and partners, we expand proven approaches.

Sustain
We institutionalize successful solutions so governments can own and lead them.

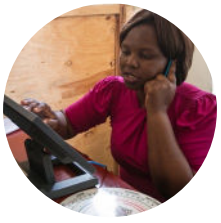
Our Expertise

Service Delivery
Extending quality health care beyond facilities through community-based, outreach and digital services.

Health Workforce
Supporting and equipping health workers to deliver quality care where it is needed most.



Health Information Systems
Turning data and community insights into better decisions and stronger health systems.

Access to Products & Vaccines
Ensuring medicines, vaccines and diagnostics are available when and where they are needed.

Drive Sustained Impact
Working with governments and partners to co-develop, scale and sustain proven solutions.

Emergencies & Resilience
Building resilient health systems that adapt to changing needs, emergencies and future shocks.

While we live and work in many countries, our offices are in Côte d'Ivoire, the Democratic Republic of Congo, Kenya, Malawi, Mozambique and the United States.
